

Lab Exercise 7

```
// Import the Express.js library const
express = require('express');

// Create an Express application
const app = express(); const
port = 3000;

// Define a route for the root URL ("/")
app.get('/', (req, res) => {
  res.send('Hello, this is the main page!');
});

// Define a route for "/hello"
app.get('/hello', (req, res) => {
  res.send('Hello, world!');
});

// Start the server app.listen(port, () => {
  console.log(`Server is running on http://localhost:${port}`);
});
```

```
